Chinook Trading Co.

GRAIN TRADE

AND MINIMUM PRICE.

The interests of wheat producers and of the grain trade are impatience of motive and act.

The Western Producer in its issue of September 3rd, referring to the decision of the government in regard to the minimum price for wheat and its reception by Western farmers, says:

"To them and to many of those whom they elected it must have come as a cruel disillusionment to find that their government chose to listen to AND BE GUIDED BY THE GRAIN TRADE and other reactionary elements in their midst while refusing even to acknowledge the submission or organized agriculture."

The implication that the grain trade or any section of it has at any time made representations to the Government, or to the Canadian Wheat Board, or has tendered advice to those bodies, relative to the establishment of the minimum price for wheat at 87½ cents per bushel or any other figure, IS ABSOLUTELY FALSE.

The interest of wheat producers and of the grain trade are identical in regard to grain prices. The prosperity of the grain trade in Canada is bound up with the prosperity of producers. It has no interest in keeping prices down. The figure at which the minimum price should be set is a matter to be decided by the Government, having in view the long which it might be prepared to sustain in the event of a decline in world wheat values. The grain trade has repeatedly tried to hold that producers must be assisted to overcome the adverse conditions resulting from drought and excessively low prices. But it has been uncooperative in attempts to fix the price at which Canadian grain should be offered in the export markets or to hold Canadian wheat at prices above its relative value in world markets because such attempts must result in (a) loss of markets and diminution of sales, (b) the creation of burdensome surpluses, (c) eventual loss both to producer and taxpayer, and (d) encouragement of uneconomic and high-cost production by our competitors.

In the continuance of the open market for grain and the preservation of every available channel through which Canadian grain can be sold are to be found a guarantee of the best returns to Canadian producers. To maintain such returns is as much the desire and interest of the grain trade as of the producers themselves.

There is room for honest difference of opinion as to what the minimum price should be. But there is no justification for false

LOCAL LINE ELEVATORS

Announcement was made September 4th, 1936, by Mr. H. E. Sellers, President of The Alberta Pacific Grain Co. Ltd., that K. C. Allen had been appointed General Manager of the Company to succeed J. R. Murray, who formerly occupied that post, and is now Chief Commissioner of the Canadian Wheat Board. Mr. Allen was formerly Western Manager of the Company. His headquarters will remain at Calgary. Mr. Allen is well known in grain circles in Winnipeg and Vancouver as well as throughout Alberta.

Miss Evelyn Hyslop, of Saskatoon, arrived Tuesday to take over the position at Mr. Youell vacated by Miss McLean.

Jack Loader who has been doing harvesting work returned Wednesday.

Mr. and Mrs. Chapman, and daughter Lorna left Saturday for Edmonton and other points north, where they will visit with relatives.

Wesley Gilbertson who has been harvesting at other points returned Tuesday.

Miss Donald McLean left for Vancouver, Friday on a holiday.

Speed Peterson, of Oyen is working on the section here.

COOLEY BROS.

A Quid Pro Quo

If the Dominion government is to open the gates ajar for the admittance of more British migrants to Canada on a colonization basis, it would seem appropriate to suggest that any agreement which may be made should include some provision for the sale of more Canadian produce in the Old Country.

From the viewpoint of Western Canada, where new settlers must necessarily engage in a competitive venture with farmers who, in recent years at least, have been forced to offer their wares in narrowing markets, such a proposal would only be a reasonable quid pro quo for accepting new settlers.

It is true that colonization schemes in general and the Hornby scheme in particular, which are now being mooted and are apparently being accorded serious consideration in some quarters, contemplate safeguards to ensure that for at least five years after admittance to the country migrants would not become charges on the administration and that failures would be returned to the country of their origin.

While this may be regarded by some people as satisfactory on the face of it, such safeguards are not sufficient for the protection of thousands of farmers in the prairie provinces who during the past five or six years have not only experienced the greatest difficulty in making a bare livelihood but have had the misfortune to stagger—and are still staggering—under an accumulating burden of indebtedness.

Such colonization schemes, insofar as the west is concerned, have land settlement as their objective which means, of course, that the newcomers will be engaged in the production of agricultural commodities. If they are successful in their efforts the volume of produce offered for sale must necessarily increase with a resultant tendency to reduce returns to all producers of similar commodities.

The only way that this trend can be offset is the creation of new or expansion of existing markets for such produce and the latter might be attained by agreements which will ensure a greater volume of sales of Canadian farm products in the country from which these migrants come. Such agreements, if consummated, coupled with rigid guarantees that the new settlers will be self-supporting, might be expected to at least minimize any indirect loss which the older settlers would sustain as a result of ensuing competition.

New Zealanders, who have been sounded out on the subject of British migration to their country have something of the kind in mind, as evidenced by the report of William Teeling, who recently visited Australia and New Zealand to examine opportunities for British settlement in the two Antipodean countries for, with respect to New Zealand, he is quoted in a recent issue of the London Times as stating:

"From both these Dominions I came away with the impression of young people in young countries convinced of the future of their race, convinced that they had something to interpret from the West to their neighbors in the Far East, and convinced that they still had a lot to do in their own countries before they were ready to admit too many strangers. They seemed, however, quite willing to admit a few under careful and proper auspices."

"It struck me that the best opening was in New Zealand, and that there it could only be achieved through the New Zealand Government (no other large body being sufficiently interested) and by a definite economic bargain for the purchase of New Zealand goods."

Without going into details of the reasons advanced, Mr. Teeling found that prospects for British migration to Australia were practically hopeless at the present time.

Thus it would appear that any British colonization in New Zealand must necessarily be very limited and must be accompanied by an economic pact as a consideration, a suggestion that should certainly be given great weight by Canadian authorities before any agreement is entered into for additional colonization in this country.

Proponents of further colonization in this country have argued that new settlers are consumers as well as producers. This is true, but if they are to be successful they must produce more than they consume, in which event a market must be found for the excess production somewhere. If they do not produce more than they consume, colonization is for them a failure and it would be better for them and the country, if the scheme were abandoned before birth.

Professor Makes Discovery

Finds Green Peppers Contain The Precious Vitamin C

The green peppers that Professor Albert Azen-Gyorgyi, Szeged, Hungary, spurned at dinner one night gave him the chief source of precious vitamin C he had sought for a long time.

On that particular evening his wife had revoked her ban on his after-hours work, and he retired to his laboratory to continue his hunt for the anti-scurvy substance.

He took the peppers with him, intending to eat them later. But instead, he subjected them to tests just as he had almost everything else available—and found what he wanted in the vegetables that abound in the neighborhood.

In a few weeks he managed to produce a pound of pure vitamin C from 4,000 pounds of green peppers which, he discovered, have four times the vitamin C content of oranges and lemons, and are cheaper.

Bear's Head On Coin

Monarch II, last known survivor of the California valley grizzly bears, now in San Francisco Golden Gate bear pit, is to be immortalized. His head will grace a coin commemorating the completion of the San Francisco-Oakland Bay bridge.

Manufactures Wind

Full-size aeroplanes can now be fully tested before being actually flown, in a wind-tunnel at the Royal Aircraft Establishment at Farnborough, England. In this huge apparatus winds up to 115 miles per hour can be manufactured to order.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ravin' to Go

The liver should pour out two pounds of liquid bile into your lower bowels. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Get this up your stomach. You get constipated. Harmful poisons go into the blood and you feel sour, sunk and the world looks lousy.

A new bow movement doesn't always get the cause. You need something that works on the liver as well. It takes three pills. One Carter's Little Liver Pill to get these two pounds of bile flowing freely. Get this up your stomach. You get constipated. Harmful poisons go into the blood and you feel sour, sunk and the world looks lousy.

Wonder House On Exhibit

Everything Electrically Operated In New Type House

Ease and convenience for persons lacking domestic servants and spare time were revealed in a "wonder house," on exhibition at New York.

There was an electric range which turned itself off when a roast was done to a crisp, doors that opened without being touched to admit housewives with armfuls of dishes, and luminous keyholes for husbands arriving home late after lodge meetings.

In the nursery an electric eye set off a series of chimes when anyone approached the baby's cradle, and a burglar alarm buzzed when the window near the cradle was opened, to make it difficult for kidnappers.

When closet doors were opened, lights immediately flashed on inside. An electrically-operated goldfish bowl with floodlights and an underwater air fountain required only one change of water each month.

Another Mystery To Solve

Reason Silica Turns Into Poison When Pulverized

Science has one mystery yet to solve in all diseases, the most dangerous of all dust diseases.

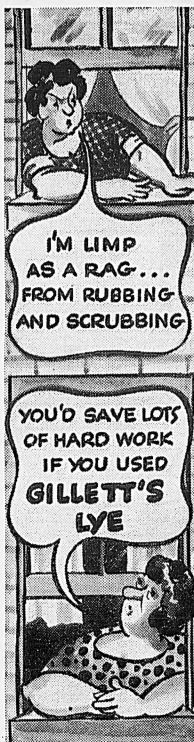

The mystery is why silica, the dust responsible, turns into a poison when ground to particles the size of bacteria. The surprising behavior of silica was explained at the Harvard centenary by Dr. W. Irving Clark and Prof. Philip Drinker at the Harvard school of public health.

Beach sand is almost pure silica. Silica is part of the beauty of opals and occurs in quartz, flint, sandstone, jasper and many other common substances. In all of them it is harmless to human beings.

When ground fine enough to fly in the air particles of silica cause a distinct, new lung disease.

Trees breathe through tiny openings on the under side of their leaves. A single apple leaf has more than 1,400 of these pores.

Our idea of the unfitness of things is for a motorcycle policeman to stop a motorcar driver for making too much noise. 2167

WASHES DIRT AWAY—no rubbing and scrubbing

Cleaning jobs are quick and easy with Gillett's Pure Flake Lye. Use a solution of 1 teaspoonful dissolved in a quart of cold water. Off comes the dirt! And you do no hard rubbing. Use it for toilet bowls, too—and to clear sluggish drains. It kills germs, destroys odors. Never harms enamel or plumbing. Get a tin from your grocer—today!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The handy Gillett's Lye Booklet shows how this powerful cleaner and disinfectant can save you hard work... contains complete instructions for making soap at home... tells how to keep farm equipment and buildings clean and sanitary. Be sure to send for free copy. Write: Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Japan's Low Labor Cost

Enables Them To Undersell Other Countries' Home Products

The St. Catharines, Ontario, Standard says a copy of the Kait Gooze Weekly, U.S.A., received in their office, contains an article which shows that cotton hosiery from Japan is making tremendous strides in the market to the South. It is shown that if the tariff were raised fifty per cent. to what it is now, Japan could undersell the home product by 18.6 per cent., all due to the low labor costs of the Japanese. Male hosiery knitters in Japan earn \$2.00 a week and female \$1.25. That is the story behind the industrialization and world market drive of the Japanese manufacturers.

A Scot entered the shop where he had recently bought a bicycle. "It's about the bike, mon," he said. "Hasn't it arrived yet?" said the shopkeeper.

"It has," said Jack, "but where's that free wheel?"

Does the 4,000 to one odds against an air raid on London, quoted by Lloyd's, mean that the British air fleet is better than London has been telling the world it is?

Not Very Long Ago

Boston Had By-Law Forbidding Bathing Without Doctor's Order

Cleanly Anglo-Saxons on both sides of the Atlantic have been shocked at the revelation, by an American plumber who has just returned from a European tour, that though the Hohenzollern Palace at Potsdam contains 600 rooms, there are only two bath-rooms in it. And the plumber found, also in Germany, a castle of 260 rooms which had no bath-room at all.

But there was a time when the Boston city fathers passed a by-law forbidding anyone to have a bath except by doctor's orders, and this was not repealed till 1862. Again, just over 100 years ago, when the Lord Mayor of London asked for a shower bath to be installed at the Mansion House the request was refused, as "the need of same has not been heretofore complained of."—London Answers.

Building Without Stairs

Will Have Ramps So Car Can Park On Any Floor

Hotels and offices in which cars can drive to any floor and houses with more than one floor, but no stairs, are being designed in London. The buildings will have ramps, like those in some large garages. The young designers claim that their plan will do away with traffic congestion, make it possible for dwellers to drive their own cars into the building and park them outside their doors, make roofs into car parks, and provide overhead roads. The inventor is an architect, Dr. M. Hoenig. Already buildings on his principle are being put up in Leeds, England and in France. The Leeds building will contain a 150 bedroom hotel, a 170 car garage in the basement and a motion picture theatre. Cars can be driven right into the building, ascending to any floor.

Little Animal Has Courage

Man Tells How Gopher Rescued His Helpless Mate

The gopher, unassuming and somewhat ratty animal, attains heights of courage that merit him a better name, says A. D. Bain, superintendent of a chain of bungalow camps in the Canadian Rockies.

On a recent inspection trip, Bain saw as he approached in his car an injured gopher lying helplessly in the middle of the road. Nearly stood another of the little animals, bristling and showing his teeth, although obviously frightened.

When Bain stopped the car, the second gopher put his teeth into the scruff of his dying mate and dragged her to the safety of the long grass beside the mountain road.

Lightning Kills Birds

Found Underneath Large Tree Which Was Not Struck

Included among the freaks of the severe lightning storm which struck Raleigh, North Carolina, was the electrocution of between fifty and sixty sparrows roosting in a tree which was not struck by lightning. The sparrows were found underneath the large tree. Since the tree was not struck it is believed the heavily charged air, coupled with the current given off by electric wires in the vicinity, resulted in the electrocution.

Gives Excellent Results

Excellent results from blood-testing poultry flocks are reported from all parts of Canada. A breeder in British Columbia who had his flock blood-tested last fall at a cost of \$16 blood-hatchery eggs to the value of \$608 to one of the commercial hatcheries. At a sale of Record of Performance certified stock by an Ontario breeder to a breeder in the United States, R.O.P. certified females sold for \$5 each and an R.O.P. male for \$15.

"The Object of his Affections"

You said it—Ogden's Fine Cut! Men who roll their own cigarettes have a yen for Ogden's, because Ogden's does roll a cooler, sweeter, smoother smoke. If you're not already acquainted with Ogden's, take a little tip—try this mellow, fragrant cigarette tobacco. Yes, sir, you'll like Ogden's Fine Cut and you'll like the way it's packaged, too—Cellophane-wrapped with the purple easy-opening ribbon. Be sure to choose the better papers—"Chantecler" or "Vogue".

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug

SELECTED RECIPES

PUMPKIN PIE

- 1 1/2 cups pumpkin
 - 1 dessertspoon flour
 - 1 cup sugar
 - 1 teaspoon ginger
 - 1 teaspoon cinnamon
 - 3/4 teaspoon nutmeg
 - 1/2 teaspoon mace
 - 1 teaspoon salt
 - 3 eggs
 - 3/4 cup milk
- Mix pumpkin, flour, sugar, spices and salt together; beat eggs, add milk and stir all well together. Pour into a deep pie plate lined with good pastry. Bake until firm (about 35 minutes) in a moderate oven.

Just Recently Known

Twenty-five per cent. of the vegetables and fruits people eat were unknown even ten years ago. They come from strains of plants that didn't exist a decade past. Cantaloupes, for instance; a popular item on many tables. A few years ago it was scarcely possible to produce them because they were afflicted by a mildew. A scientist discovered a species in India that resisted mildew and, by cross breeding, made the plants of this continent.

After 400 years, one of the best-known "ports of call" along London's waterside, The Turk's Head Inn, Wapping, has been closed.

Hundreds Of Suggestions

Lord Mayor Of London Receives Ideas For Memorial

Several hundred suggestions for a King George Memorial have been received by the Lord Mayor of London and he and the King George Memorial Fund is considering them. Among them are renaming Trafalgar Square, King George Square, removing Nelson's Column and the Lions to Tower Hill, erecting statues of King George and his four sons, and placing the Cenotaph in the centre of the square are some. A flood-lit Mausoleum in Hyde Park is another. The erection of a colossal flood-lit statue on the cliffs of England, near Le-on-Solent, similar to the Statue of Liberty in New York, visible at sea for 20 miles, is still another.

Has Supple Fingers

Leo M. Stenzler, of Walters' Union, No. 16, of New York City, by the genius of his supple fingers, can produce, at a moment's notice, from a plain table napkin a bishop's mitre, a wedding candle, a sailboat or a clown grinning under a fool's cap. He demonstrated his prowess recently before a meeting of the Hotel and Restaurant International Alliance in Rochester, N.Y.

According to a correspondent of Collier's, an undesirable alien is a foreigner who makes more money than he does.

HOUSE BURNED

Mr. and Mrs. H. R. King living about 25 miles south of Chinook, who had been sleeping in a small house for the summer months, which was quite close to their other house, were startled at 5 o'clock in the morning on Saturday, to find that their home was burning. When the fire was discovered it was too late to save anything that was in the house.

Fortunately, all their clothing and most of their beds and bedding were in the house in which they were sleeping. They also saved their cream separator and washing machine.

All their furniture and household goods were burned, amounting to over \$1,000, and there was no insurance.

The cause of the fire is not known.

The September meeting of Women's Institute, postponed on account of the constituency Conference, will be held Wednesday, September 16th, at Mrs. Otto's home. The programme is in charge of committee. Mrs. Eaglesham is giving a talk on the new curriculum.

The Ladies' Card Club

The Ladies' Card Club met Tuesday evening at the home of Mrs. Milligan. The honors were shared by Mrs. Lee and Mrs. Youell. The club will meet at Mrs. Youell's home next week.

A MATTER OF PRINCIPAL

If grain growers do not fight for their own interests, who will aid them?

The Alberta Wheat Pool is continually striving to improve the lot of the grain growers.

Better protection and better is the objective sought.

The Pool is the only grain handling organization keeping up the battle. It fights alone, among commercial concerns, for a living wage for grain growers.

The grain growers can most effectively help by delivering their grain to

ALBERTA WHEAT POOL ELEVATORS

LOCAL NEWS

Miss Carpenter, District R. N. of Sunnynook, spent the week end at the home of Mrs. R. Stewart.

Mrs. W. W. Isbister was the guest of Mrs. E. L. Coad of Youngstown, over the week end.

Jas. Wilson came to town this week where he will attend high school.

Miss Joan Bayley left last week end for Vancouver where she will spend a holiday.

Mrs. N. D. Stewart motored to Calgary, Tuesday where she will take the train for Vancouver, where she will visit with relatives.

Mrs. Stewart and Mrs. McKenzie are visiting at the N. D. Stewart home this week.

Miss Irene Shire left Tuesday for Calgary where she will attend Normal School.

Mrs. A. Wiluch and son Paul left for Poland on Sunday. Mr. Wiluch accompanied them as far as Winnipeg.

Miss Gracie Coutts, of Swan School district, has moved to Chinook where she will attend high school.

Mr. and Mrs. P. Berry and daughter, of Ailmont, Vontanna, who have been visiting with the former's parents returned to Ailmont, Vontanna Monday.

Miss Betty Milligan who has been visiting with Mrs. Harry Smith, of Hanna, returned Friday.

Gordon Anderson returned from Rowley Tuesday where he has been working during the summer months.

Miss Donald McLean spent Sunday with her parents at Alaska.

Mr. Albertas spent the week with his family, returning Tuesday.

The village boys are giving their Model "T" Ford an overhaul, and so doing are learning lots that they did not know about a car before.

Wes Seeger and Roy Gillette are leaving about Monday for their "new found land".

Mr. Hoblen reports there was frost last Sunday evening, when he arose next morning there was a white covering on his cucumbers, but it was not heavy enough to do any damage, however, the time will soon come when we get up to find that all the flowers will be a dull black.

The tourist season is almost over, for fewer tourists have been coming into town or passing along the highway.

Kicked By A Horse

While preparing to go to work on Tuesday morning, Mr. J. C. Turple met with a painful accident. On entering the stall to take one of the horses out, the horse pushed him against the wall, kicking him several times. Mr. Turple escaped via of the manger and a front door. After a brief respite he hitched the horses, went to the field and lugged three or four rounds but by that time he decided he should seek medical attention.

Dr. Argue, of Hanna, found that Mr. Turple's collar bone and 4 ribs were broken. Joe will be confined to hospital for a few days. We wish him a speedy recovery.

Financial Statement of Alberta Pacific Grain Co.

Operations of the Alberta Pacific Grain Company Limited for the year ended June 30, 1936 resulted in a loss of \$12,243.52 compared with a profit of \$1,231.12 for the previous year, according to the financial statements made public today by H. E. Sellers, President of the Company. Total income of \$17,224.61 was met by \$32,933 added to depreciation reserves.

In view of the uncertainty of the outlook for the coming year on account of the poor harvest in Western Canada, necessity of considering further extension of suspension of Sinking Fund operations in connection with the Company's \$3,500,000 First Mortgage bond issue will be considered by the Directors during the current year, the report indicates.

The report of the Directors to the Shareholders states, in part:

"Further improvement of \$294,333.47 in working capital position was effected during the year. The arrangement made with the First Mortgage Bondholders in 1934 for the suspension of Sinking Fund payments for a period of three years, expired on June 1st last. The results of operations during current year will be the deciding factor on whether application for an extension of suspension of Sinking Fund payments will be made to the Bondholders."

"Both excursions returned to the Prairie Provinces again this year for the seventh time in the past eight years, and indications are that the 1936 crop will be the smallest harvested since 1919. Company's properties have been maintained in good repair. Taxation continues to be a heavy burden in the operations of the Company. During the year under review an amount of \$92,070.80 was contributed to Dominion, Provincial and Municipal governmental bodies in the form of direct taxes."

The Alberta Pacific is one of the large elevator companies operating in Canada. The company operates 371 country elevators, located throughout Saskatchewan, Alberta, and terminal elevators at Vancouver.

Directors and officers of the company are: H. E. Sellers, President; K. C. Allen, General Manager; Cecil Lamont, Secretary; C. J. Binney, Treasurer; A. P. Oliver, Montreal; C. W. Band, Toronto; H. W. Webster, Winnipeg; L. Kilham, Vancouver; and R. W. Ward, Calgary.

The annual general meeting of shareholders will be held in Calgary, October 27th.
